

GENERSON

GENERATOR

GENERAL CATALOGUE

2025

About us

Generson is an export-oriented company for premium diesel generator brand which was established in 2018 by two engineers with 100 percent Turkish capital as the result of 19 years of experience.

Generson exports 90% of its generator set production which between 3,5 kVA up to 2500kVA with the annual capacity of 1000 units to more than 20 different countries.

With research and development studies, Generson continues to work on optimizations that work more efficiently and be user friendly to satisfy our stakeholders benefits.

Generson produces premium diesel generators with customer-oriented production capability and does not hesitate to share it's experience with partners in engineering and project studies. Apart from industrial type generators; Generson has a wide range of gasoline and diesel portable generators, lighting towers, open skid and super silent generators, tailor-made special engineering projects that are carried out in line with customer requests.

The chassis, silencers, electrical panel and canopy which used in Generson generator sets are produced in the house. Using the advantage of this, customer requests can be met at an optimum level with a best possible short time of period.

Generson has considerable references in many countries in the 3 continents on remote monitoring and management of generators, internal-external fuel tanks with automatic fuel filling systems, twin and synchronous generator projects.

Europe, the Balkans, the Middle East, Central Asia and the Africa, in more than 20 different countries. It makes us proud to know that our brand is a solution partner in many important projects in these countries and we will continue to be one of Turkey's rising value in Premium Diesel Generator manufacturing.

Genererson Principles

Quality

To provide the best possible products and services in line with customer demands, raising the quality brand perception higher.

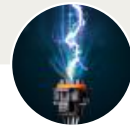

Timing

To provide the fastest supply in the sector in line with systematic production with high stock capacity.

Innovation

To always produce better products and services in line with our business principles without compromising quality.

Diversity

To produce tailor made products by establishing strong collaborations with brands that have proven their quality worldwide.

Responsibility

To provide excellent service in every process, from promotion to after-sales service.

Our Mission

To be a company that satisfied our stakeholders as permanently with our fresh and dynamically perspective.

We produce and supply robust and high quality diesel generators. Our aim is not only to produce generators, We aim to create robust diesel generators that we'll proud of with them, along all of their lifecycles.

Our Quality Certificates

We operate Integrated Management System that consist of three systems (ISO 9001, ISO 14001 and ISO 45001) in GENERSON.

In addition, we have ISO 10002 Certification.

ISO 9001: Quality Management Systems

ISO 14001: Environmental Management System

ISO 45001: Health and Safety Management System

ISO 10002: Customer Satisfaction. Complaints Handling

Our Services and Solutions

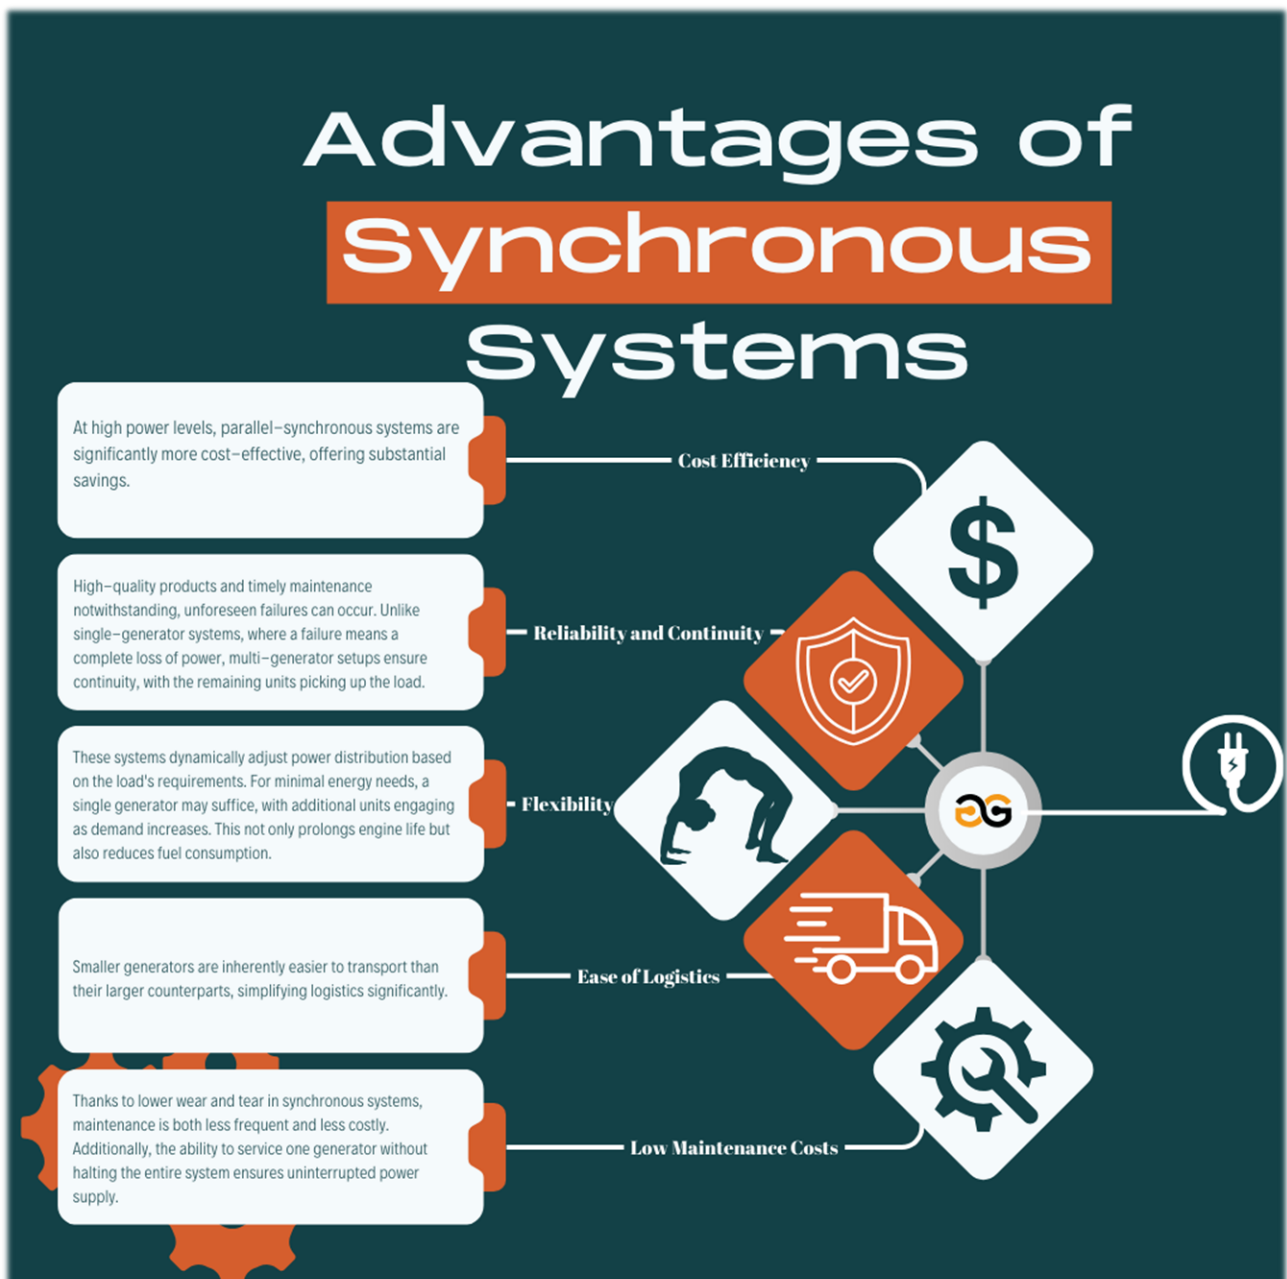

Synchronous Systems

In cases where high power is needed, synchronous systems can be defined as parallel operation of more than one generator.

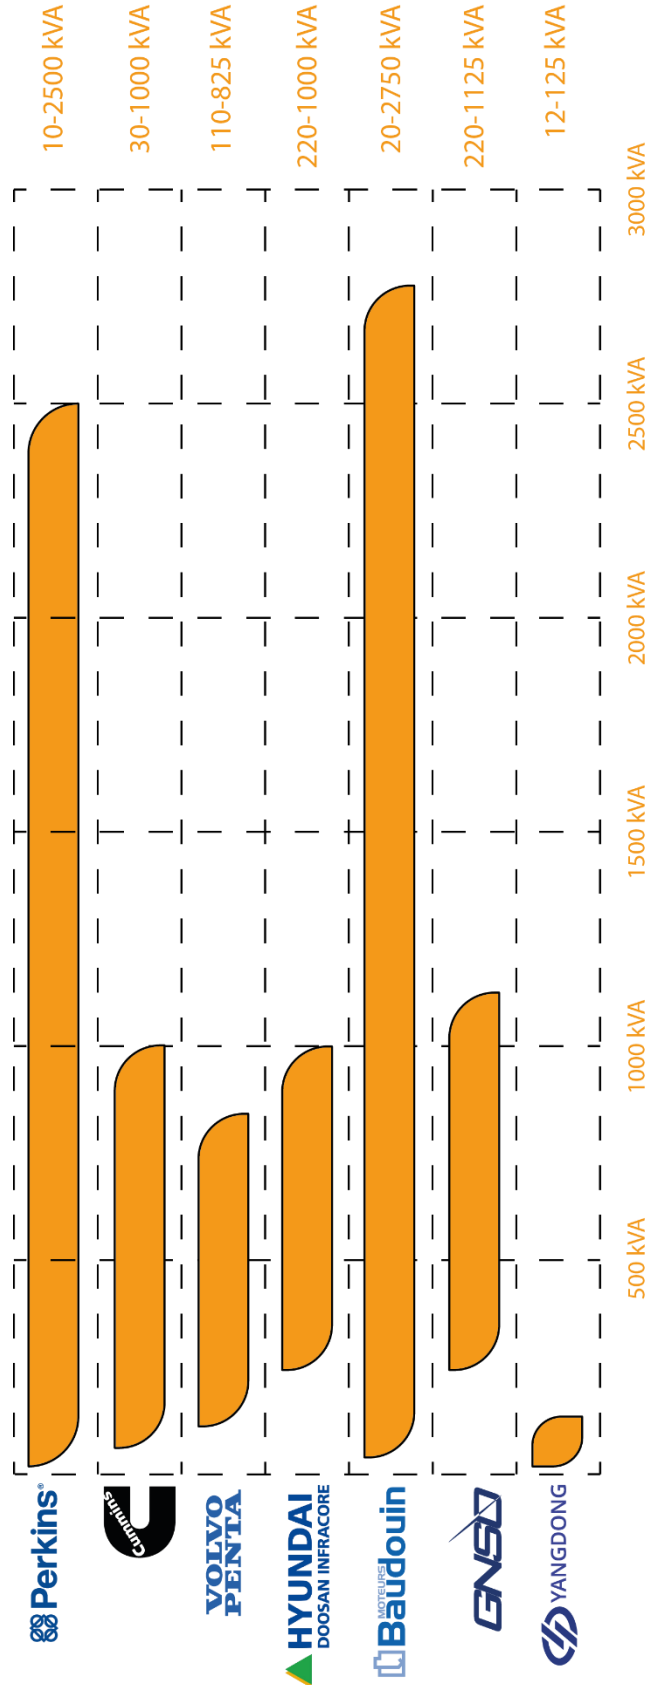

Diesel generator set is a high cost item in a project. In cases where the project is suitable, synchronous systems provide many advantages, especially reducing the initial investment cost. Small generator sets operating in parallel offer all the benefits of a single large generator set.

By choosing Generson synchronized systems, you can reduce the initial investment budget and establish a problem-free, flexible system by including generator sets of different quantities and powers according to the need in the project.

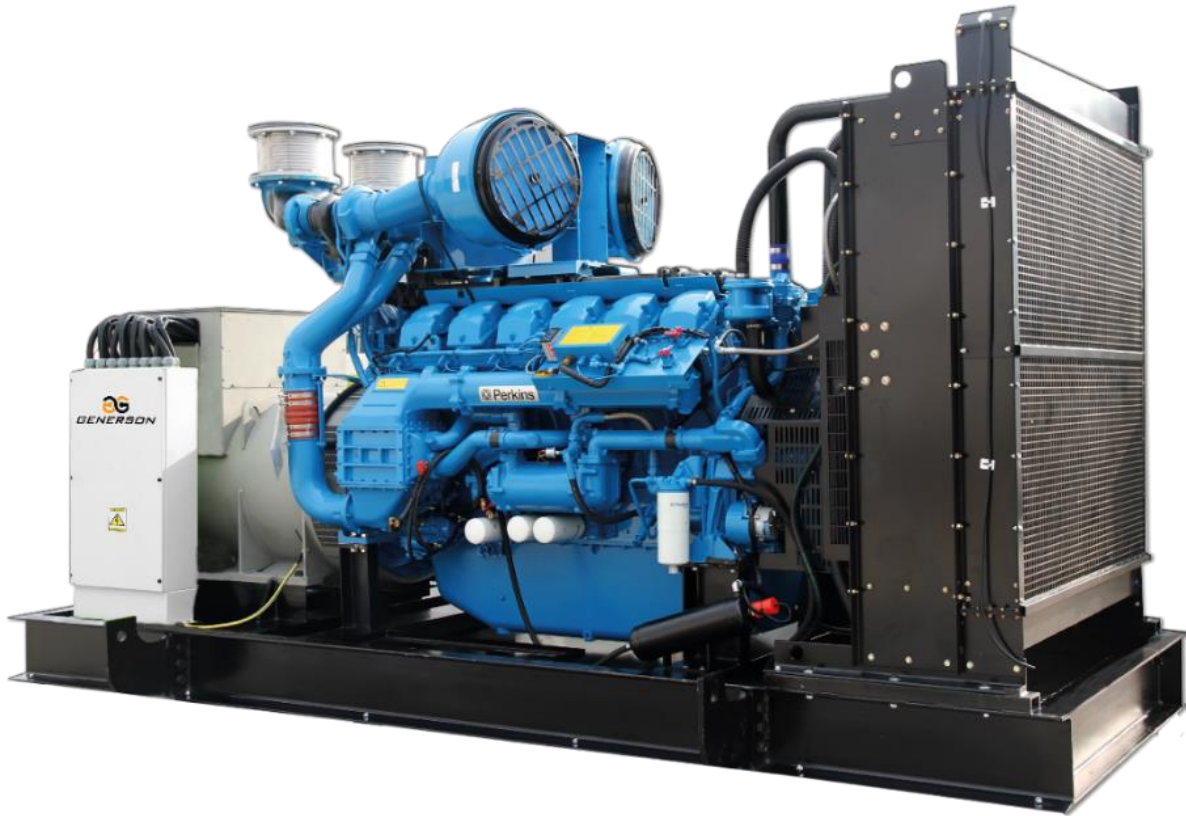

Diesel Generator Power Range

Diesel Generator Sets

GNPR Perkins Series Generator Sets, 10-2500 kVA

 **Perkins®**

Perkins; with nearly 20 million engines produced, of which more than half are still running all around the World. Perkins products have earned a reputation for reliability, dependability, flexibility, integration and low cost of ownership. Perkins producing capacity up to 800,000 units/year. The largest single customer for these engines is Caterpillar. Since December 1997, Perkins has been part of Caterpillar.

GNV Volvo-Penta Series Generator Sets, 110-825 kVA

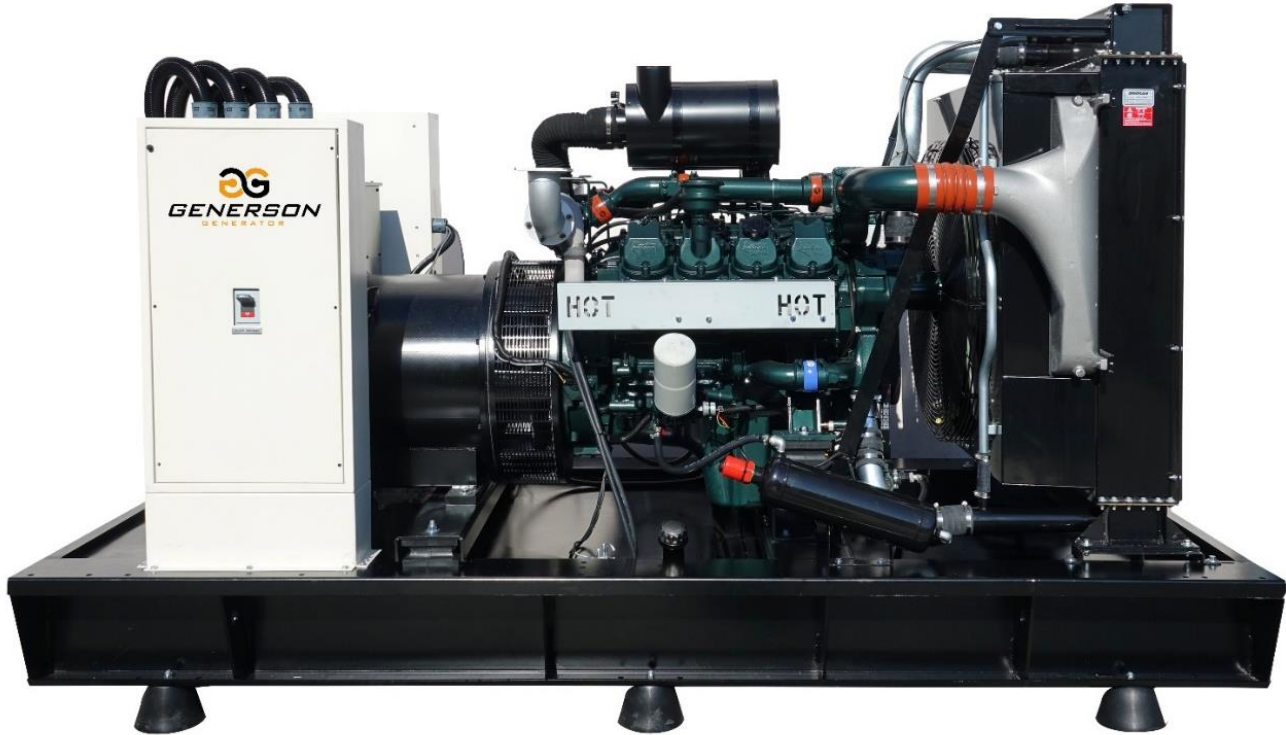

VOLVO
PENTA

Volvo Penta is a Swedish marine and industrial engine manufacturer, a joint stock company within the Volvo Group. Volvo Penta is a leading supplier of engines and power systems for leisure and commercial boats and for industrial applications such as power generation, cranes and container handling equipment.

GND Hyundai Doosan Series Generator Sets, 220-1000 kVA

HD Hyundai Infracore, formerly known as Doosan Infracore, is a South Korean company that manufactures construction equipment and engines. It is one of the largest construction equipment manufacturers by sales revenue. In 2021, Hyundai Heavy Industries Group purchased a 35 percent stake in Doosan Infracore. HD Hyundai Infracore is rapidly on the way to becoming the one of the World's top engine maker.
